# Flowy

GPS LOCATION AND RAIL DELAY MONITORING

## Track every train. Monitor every delay. In real time.

Flowy tracks each train's location and matches it to the correct service. **By comparing actual times with the timetable**, it displays **early running, delays and passenger numbers in real time, down to each stop**.

| LIVE POSITION | ARRIVAL + DEPARTURE | MULTI-SERVICE HISTORY |
|---|---|---|
| along the route | schedule variance in minutes | services and stops over time |

## How we turn a GPS coordinate into operational data

**01 Collects**
Onboard GPS or AVM system data.

**02 Matches**
Vehicle, service, direction and stop.

**03 Calculates**
Actual vs scheduled time.

## Two operational views, instant insight

### LIVE VIEW
